DevOps Engineer with expertise in Cloud Infrastructure, CI/CD automation, and container orchestration, focused on building scalable, reliable, and efficient IT solutions.

Education

Bachelor of Engineering – Information Technology | Aug'19 - Jun'23 | Priyadarshini College of Engineering University, Nagpur, Maharashtra

Higher Secondary Certificate (HSC) – Class XII | Jul'17 – Jul'19 | Vidya Vihar Convent High School and Jr. College Maharashtra State Board (MSBSHSE)

Secondary School Certificate (SSC) – Class X | Apr'16 – Jun'17 | Vidya Vihar Convent High School and Jr. College Maharashtra State Board (MSBSHSE)

Knowledge Purview

CI/CD Pipeline Automation

Docker & Containerization

Kubernetes Orchestration

Cloud Infrastructure

Infrastructure as Code

Configuration Management

Monitoring & Observability

Linux Administration & Scripting

DevOps Tools, Automation & Release Management

Profile Summary

- DevOps & Cloud Technologies:** DevOps Engineer with hands-on expertise in CI/CD automation, cloud infrastructure, containerization, and Infrastructure as Code (IaC) using Jenkins, AWS, Docker, Kubernetes, Terraform, and Ansible.
- CI/CD Automation:** Reduced manual deployment effort by 60% by implementing Jenkins-based CI/CD pipelines integrated with Git, improving deployment efficiency and release consistency.
- Kubernetes & Containerization:** Orchestrated 5+ microservices using Docker and Kubernetes with load balancing, health checks, and automated deployment practices to support scalable application delivery.
- AWS Cloud Infrastructure:** Provisioned and managed AWS infrastructure including EC2, IAM, VPC, and RDS using Terraform, enabling repeatable, version-controlled, and scalable cloud deployments.
- Monitoring & Observability:** Implemented Prometheus and Grafana monitoring dashboards to track application performance, resource utilization, and system metrics, strengthening operational visibility and reliability.

Internship

Apr'25 – Oct'25 | DevOps Engineer Intern | HighCatch Pvt. Ltd

- Provisioned AWS infrastructure across EC2, IAM, VPC, and RDS using Terraform modules for repeatable, version-controlled deployments.
- Architected scalable 3-tier AWS infrastructure with load balancing to optimize traffic distribution and fault tolerance.
- Automated configuration management and application setup across multiple environments using Ansible playbooks.
- Implemented Prometheus and Grafana monitoring dashboards for real-time application performance, resource utilization, and alerting.
- Collaborated with development teams to streamline deployment work-flows and document CI/CD pipeline processes.

Projects

Microservices-Based Food Delivery Application Deployment | GitHub Link

- Architected and deployed a Docker-Kubernetes food delivery platform with independently scalable microservices, service discovery, load balancing, and health checks.
- Built a Jenkins CI/CD pipeline on AWS EC2 with automated build, test, deployment, auto-recovery, and rollback.

Online Ticket Booking Application Deployment | GitHub Link

- Designed and implemented a CI/CD pipeline using Git, Jenkins, Docker, and Kubernetes for a high-traffic ticket booking application.
- Provisioned AWS infrastructure with Auto Scaling Groups and RDS for high availability and horizontal scalability, while applying security hardening and Ansible-based configuration management.

AWS 3-Tier Architecture Deployment | GitHub Link

- Deployed a scalable 3-tier web application using AWS EC2, RDS, and VPC networking across presentation, logic, and data layers.
- Configured subnet segmentation, security groups, NAT gateways, and load balancers for secure and resilient inter-tier connectivity.

Technical Skills

- Cloud Platforms:** Azure, AWS (EC2, S3, IAM, VPC, RDS)
- Containerization & Orchestration:** Docker, Kubernetes
- CI/CD Tools:** Jenkins, GitHub Actions
- Infrastructure as Code:** Terraform, Ansible
- Monitoring & Observability:** Prometheus, Grafana, Application Performance Monitoring
- Scripting & Programming:** Python, Bash
- Databases:** MySQL (SQL), Familiarity with NoSQL concepts
- Version Control:** Git, GitHub
- Build Tools:** Maven
- OS & Networking:** Linux (Ubuntu/CentOS), networking fundamentals, troubleshooting AI Productivity
- Tools:** Claude, Gemini, ChatGpt

Personal Details

Date of Birth : 10th November 2000

Languages : English, Marathi, Hindi
